

DISTRIBUTION OF THE HABITAT TYPES FROM ANNEX I OF THE HABITATS DIRECTIVE (92/43/ECC) ALONG THE ROADS NO. 8, 19 AND PLANNED EXPRESSROAD S-8 IN POLAND

Legend
The natural habitat types of Community interest listed in the Annex I of Habitats Directive

- Bog woodlands (code: 91D0*)
- Alluvial forests with *Alnus glutinosa* and *Fraxinus excelsior* (code: 91E0*)
- Galio-Carpinetum oak-hornbeam forests (code: 9170)
- Central European lichen scots pine forests (code: 91T0)
- Depressions on peat substrates of the *Rhynchosporion* (code: 7150)
- Transition mires and quaking bogs (code: 7140)
- Active raised bogs (code: 7110*)
- Degraded raised bogs (still capable of natural regeneration) (code: 7120)
- Lowland hay meadows (code: 6510)
- Hydrophilous tall herb fringe communities of plains and of the montane to alpine levels (code: 6430)
- Xeric sand calcareous grassland (code: 6120*)
- Natural eutrophic lakes with *Magnopotamion* or *Hydrocharition*-type vegetation (code: 3150)

- hydrogenic habitats not listed in the Annex I of Habitats Directive (extremely sensitive to water conditions changes)
- forests
- settlements
- planned expressroad
- NGO's suggestions
- existing roads
- boundary of the study
- boundary of Sites of Community Interest (p - potential)
- boundary of the Biebrza National Park
- boundary of the nature reserves
- waters, springs
